Teagle Machinery Ltd was established over 75 years ago, manufacturing the first Tomahawk bale shredder in 1983.

We remain a family business focussed on meeting the needs of our customers whether just around the corner, or in one of the 35 countries worldwide to which we regularly ship machinery.

From the outset, our machinery has been designed to be simple, robust and easy to use. We still stand by these values, with all our products being tested extensively on farms throughout the world to ensure that they perform reliably day-in day-out, under the toughest conditions.

The company now employs around 140 people, most of whom are based at our 150,000sqft production facility in Cornwall, England.
A model to suit your needs

Attention to detail - through our focus on feeding and bedding machinery over the last 30 years, we are able to offer a machine to fulfil your needs.

Experience - thousands of farmers benefit daily from our experience in designing and manufacturing machinery that delivers on performance and reliability.
Why own a Teagle bale processor?

Saving you time and money!

1. **For Bedding**
   - **Labor saving** - one person can quickly and easily bed livestock.
   - **Save straw** - users regularly report up to 30% savings. Straw is spread evenly across the entire bedding area. Only spread as much straw as is required in each pen.
   - **Cleaner and healthier livestock** - straw is lightly shredded for improved moisture absorbance. Because straw is not chopped the bed retains its structure to provide hygienic lying areas. Straw is incorporated with the muck more evenly for improved field application.
   - **Safer bedding** - no need to enter the pen.
   - **Alternative materials** - corn stalks, soya bean straw and other low value materials can be processed.

2. **For Feeding**
   - **One machine, two jobs** - bed down and feed with all Tomahawk models.
   - **Versatility** - if you can bale a crop, we can shred it! Feed bunker or baled silage*, hay and root crops.*
   - **Improve palatability** - users report increased feed conversion of shredded bale silage.
   - **Livestock cannot be selective** - wastage is reduced.
   * except Dual Chop

3. **For Processing**
   - **Pre-process** straw for mixer wagons using our unique ‘Dual Chop’ system.
   - **Improve efficiency** - reduces mixer wagon processing time.
   - **Effective feed conversion** - precision cut straw stimulates digestion.
   - **Prevent over-processing** of silage in a Total Mixed Ration.
   - **Process on demand** - no need to stockpile.

4. **Value for money - Impressive Payback**
   Existing Teagle Tomahawk owners are fully aware that the product can give an excellent return on investment in a very short time. All factors must be considered including commodity values, tractor operating costs, hourly labor rates and improved livestock welfare, all of which make the Tomahawk a hands down winner.
Compact Performance

The 7100 offers unrivalled capacity and excellent performance from a mounted machine, without impeding maneuverability and visibility.

Standard Equipment:
- Electronic in-cab controls
- Swivel chute with 280° rotation
- Single crossbeater
- Adjustable feed slide on swivel chute model
- High pressure hydraulic filter
- Slip and overrun clutch on PTO
- Bed speed indicator
- Remote tailgate switch

Options:
- Side discharge chute
- Road lighting kit
- Tailgate extension - recommended for full size rectangular bales
- Castor wheels

For option details see page 5  See specifications page 15-16 for bale capacities
Consistent output
The bale restraint design works with the grippers on the slats to give a good tumbling action, ensuring a consistently high discharge rate with all materials.

Easy loading
Tailgate is flared for easy self-loading and is supported by two hydraulic rams to enable the heaviest of bales to be loaded.

Easy maintenance
If a foreign object causes damage to the paddles they can be unbolted, repaired or replaced without removing the fan or splitting the machine.

Improved delivery
Large diameter fan with eight wide paddles deliver enormous air flow.

Visual feedback
Indicator provides the operator with visual indication of bed chain speed.

Robust transmission
Chain drive to crossbeater ensures reliable transmission of maximum power.

Heavy duty bed chain
Heavy duty bed chain with slats attached by ‘U’ bolts for easy maintenance. Grippers welded onto slats ensure positive bale feed.

Wireless control
Slimline control panel uses Bluetooth® wireless technology for straightforward communication between the operator and the machine.
The Market Leader
The most popular bale processor on the market. Our progressive engineering delivers outstanding reliability and performance.

Standard Equipment:
- Electronic in-cab controls
- Remote tailgate switch
- Swivel chute with 280° rotation
- Single crossbeater
- Adjustable feed slide on swivel chute model
- High pressure hydraulic filter
- Slip and overrun clutch on PTO
- Bed speed indicator
- 10.5/15 wheels

Options:
- Side discharge chute
- Road lighting kit
- Tailgate extension
- Wide angle PTO

For option details see page 5
See specifications page 15-16 for bale capacities
Features and Options

1. Remote control tailgate & bedchain switch
   Load bales without having to return to the tractor cab, ideal when removing netting or wrap (standard on all models).

2. Greedy Boards
   Increase capacity for loose materials (standard on 8500 and 8555 models).

3. Tires & Fender Kit
   Road work or muddied area these oversize tires and fenders are a great safety feature and also will protect your investment (standard on 8500, 9500 and 1010).

4. Hose Adaptor
   Flexibility with accuracy when using the Hose adaptor and extended spout to bed calf hutches. (Hose not included)

5. Tailgate Extension
   Increase capacity and ease of loading, attaches easily to a standard tailgate (not required on the 1010).

6. Side chute
   Deliver only to the right hand side, with slightly greater blow distance than the swivel chute. Discharge height is lower for easier access to buildings. Chute can be raised or lowered as required.

7. Swivel chute
   For flexibility of delivery, the chute rotates 280° allowing material to be directed to where it is needed. An adjustable feed slide is fitted for accurate placement of feed materials.

8. Swivel chute extension
   To deliver material behind the Tomahawk 9500 and 1010 the optional swivel chute extension is required.

Road lighting kit
Essential for highway use, the front and rear markers ensure that you operate safely when travelling on the road. (standard on 8500, 9500 and 1010).
The Professionals’ Choice

A wider body for greater capacity and easier loading of 5ft wide bales. Industrial grade durability is provided by a wear resistant steel plate in the fan housing. Suitable for corn stalks.

Standard Equipment:
- Electronic in-cab controls
- Swivel chute with 280° rotation
- Road lighting kit
- Adjustable feed slide on swivel chute model
- Remote tailgate switch
- High pressure hydraulic filter
- Slip and overrun clutch on PTO
- Bed speed indicator
- 12.5/15 wheels and fender kit

Options:
- Side discharge chute
- Tailgate extension
- Wide angle PTO
- Self loading tailgate (see page 11)

For option details see page 5    See specifications page 15-16 for bale capacities

FEEDS
Silage/Baled Hay

SPREADS
Straw/Corn stalks up to 80’

CAPACITY
125 Bushels

DUAL CHOP OPTION
See page 7 - 8
Chop short/spread long at the touch of a button

The ‘Dual Chop’ system incorporates a set of retractable blades that can be repositioned at the touch of a button, changing straw output from short chop (around 1½") to no chop, and back again when desired in a matter of seconds.

1. **Crossbeater**
   Straw is teased from the bale by hooks positioned on the crossbeater.

2. **Blades**
   When the blades are lowered, straw is chopped using a scissor action.

3. **Screen**
   The straw then passes over a screen located behind the knife cassette. If the straw is too long it is recirculated through the blades by the crossbeater.

4. **Blanking plate**
   When the blades and blanking plate, shown in green, are raised straw passes above the screen and is discharged, without being chopped.

5. **Fan chamber**
   Straw that passes through or over the screen is drawn directly into the fan chamber for discharge.

Ultimate versatility

Ideally suited to reversing in cubicle sheds the 7150 Dual Chop offers the ultimate in maneuverability.

Rugged performance

The 8555 Dual Chop, is developed to resist wear caused by chopping bales of corn stalks, even the varieties bred with especially hard stalks to resist wind damage.

The unique ‘Dual Chop’ system is available in swivel chute versions:
7150 mounted (above left), 8150 trailed (not shown), 8555 wide body trailed versions (above right)
Benefits of pre-processing materials

Chopped straw is required for a variety of applications, which includes additional feed for a TMR and livestock bedding.

1. **Save time and fuel**
   Time and fuel can be saved by processing straw prior to it being added to the ration in a diet feeder.

2. **No over processing**
   Pre-process straw so that the diet feeder does not need to mix for as long, thereby reducing the problem of over processing the silage in the ration.

3. **Selective chop length**
   Chopping down to 1½” with clean cut ends, means you can select the ideal length for feeding to create effective rumen stimulation and increased milk yields. For bedding free stalls, short chop is fine enough for pumped manure systems.
Monitor your input costs

- Weighing of feed materials to control diets.
- Weighing of bedding materials so that costs can be monitored.
- Prevention of inconsistent loading and inaccurate unloading.
- Improved feed/bedding stock management.
- Feed cost reduction through improved efficiency.

“We’re using about 100 acres less straw.”

Jeff Gibson (pictured), who runs a diverse livestock and farm shop enterprise with his father Mike and brother Andrew at Wingham near Canterbury, is enthusiastic about the Tomahawk 1010s contribution to the business since it was purchased in 2012.

It is a versatile machine because as well as feeding we use it for strawing the cattle yard and our outdoor pig arcs as well.”

Measuring Inputs
To maximise returns, ration control and straw use are significant factors in helping keep costs in check – and the Tomahawk feeder-bedder is helping in both respects.

Adding a weighing system to a machine which dispenses both feed and bedding helps manage both.

Saving Straw
The yards used to be strawed by driving in with a tractor and loader and shaking straw off the grab; now it is blown in from outside the yard and is an altogether more efficient process.

“In winter, we were using 22 bales a week, now we’re down to nine, and of course, there will be less dung to dig out and spread when we clear the yards.”

Balancing feed
When feeding - “we need to accurately balance the maize and grass, and to put out the correct amount to minimise wastage. I half fill the machine with clamped maize using a shear grab, then take bites out of silage bales and add them on top,” explains Mr Gibson.

“The shredding drums do a pretty good job of chopping and mixing – and although they may not mix as thoroughly as a diet feeder, the machine does produce a nice open feed that the cattle tuck into.”

Straw consumption fell from 22 to just nine bales a week in winter thanks to the shredding and spreading action of the Tomahawk.

Weigh Cell Standard:
- Memory Plus (M+) and Recall Memory (RM) features
- Total Loads / Total Weight / Average Weight
- ‘Hold’ key to freeze display (when moving wagon)
- Optional – remote and serial ports

Programmable Option:
- Storage for up to 200 ingredients
- Automatic adjustments for the ration
- Loading review
- PC data transfer
- Alerts operator of approaching target weights
Our latest ‘wide body’ design

• Greater capacity, easier loading
• Increased output and delivery
• Compact and manoeuvrable
• Hardened Steel fan housing

SPREADS
- Clamp/Chopped Silage
- Straw up to 72’

CAPACITY
- 230 Bushels

Standard Equipment:
- Electronic in-cab controls
- Swivel chute with 280° rotation
- High pressure hydraulic filter
- Twin crossbeaters
- Adjustable feed slide on swivel chute model
- Remote tailgate switch
- Slip and overrun clutch on PTO
- Road lighting kit
- Bed speed indicator
- 305/55 R22 wheels & Mudguards

Options:
- Side discharge chute
- Wide angle PTO
- Tailgate extension (24”)
- Weigh system (see page 9)
- Greedy boards
- Braked axle
- Swivel chute extension (see page 5)
- Self loading tailgate (see page 11)

For option details see page 5  See specifications page 15-16 for bale capacities
More productivity, less driver fatigue

Quick and easy loading with the Self Loading Tailgate. Simply replaces the standard tailgate and eliminates the need for a secondary loading vehicle.

**Suitable for Tomahawks 8500, 8555, 9500, 1010**

**Standard Features**

- Eliminates the need for a secondary loading vehicle.
- Simply replaces the standard tailgate.
- Pivoting lift arm for offset loading to account for bale stacking arrangement.
- Adjustable Tine for loading all sizes of round bale.
- Hydraulic check valve on pivoting lifting arm ram.

Scan to watch the Self Loading Tailgate in action.
Massive capacity and output

The 1010 holds up to 4 rectangular or round bales. Wear resistant steel plate in the fan housing - suitable for corn stalks. Track your input costs with the weigh cell option.

Standard Equipment:
- Electronic in-cab controls
- Swivel chute with 280° rotation
- Twin crossbeaters
- Adjustable feed slide on swivel chute model
- Remote tailgate switch
- High pressure hydraulic filter
- Slip and overrun clutch on PTO
- Bed speed indicator
- 3.85/55 wheels

Options:
- Side discharge chute
- Wide angle PTO
- Weigh cells
- Chute swivel extension
- Self loading tailgate (see page 11)

For option details see page 5  See specifications page 15-16 for bale capacities
Delivers flexible spreading

No tractor required! The Telehawk encompasses all the benefits of its market leading Tomahawk models and is for use with a Telehandler.

Length (without brackets) | 12’ 2”
Width                  | 5’6”
Height                 | 8’3”

* Oil flow at headstock

** The hydraulic system requires a single acting valve with an unrestricted return. Maximum return line pressure: 290psi.
Other machines in the Teagle Range

**Drum Tomahawk**
Four different chopping systems, diameters and lengths of drums make this range suitable for almost any application.

**Drum 404M/505M**
Different screens are available for chopping dry material to a consistent chop length, from 3/8” to 5”.

**Titan rear discharge muck spreaders**
From 170 to 397 bushel capacity with a fine and even spread pattern. Outstanding strength and quality as standard.

**Super-ted**
High speed swath conditioners to promote faster drying. Ideal for recovery of rain damaged crops – your wet weather insurance.

**Spiromix**
Deep spirals inside the drum ensure a quick and thorough mix. Easy to load through the wide mouth and is reversed to self-unload.

**XT Fertiliser Spreaders**
From the 515lb single disc Compact 8 to the 3416lb twin disc XT48 with quadruple overlap, Teagle spreaders offer simplicity, accuracy and reliability.

---

**Intelligent design**
Teagle use state of the art software throughout the design process to ensure that strength is in-built where it is needed most.

**Customer service**
For outstanding back-up we have an extensive dealer network, supported by our experienced sales team.

**Quality built & backed**
To keep your Tomahawk running, Teagle distributors carry a comprehensive stock of genuine spare parts.
